# TRILOG COLORPLOT 100™

## Printer/Plotter The Plain Paper Multicolor Plotter

- TRILOG'S proprietary multicolor technology
- Either multicolor or standard black
- 100 dots per inch vertical and horizontal
- High quality, low cost plotter output
- Equally high text quality for word processing applications
- Plain paper — up to 6 copies
- 4" to 16" form width
- 150 or 250 lpm printing speed
- No toners or chemicals required
- 96 character ASCII set standard

COLORPLOT 100 provides low-cost, high-quality color plotting and text quality printing, comparable to ink jet and xerographic methods at a fraction of their expense.

COLORPLOT 100 utilizes raster matrix impact technology and TRILOG's proprietary multicolor ribbon drive to plot either multicolor or standard black copies on plain fan fold paper at a cost of about 0.5¢ per copy.

COLORPLOT 100 reduces paper cost by as much as 75 percent, compared to electrostatic methods. Forms from 4 to 16 inches wide and up to six parts can be accommodated on COLORPLOT 100.

Asynchronous color plotting enables color to be printed in any order, eliminating specific formatting of input. And because no toners or chemicals are used, COLORPLOT can be stopped for extended periods with no quality degradation.

TRILOG's proprietary COLORPLOT bidirectional drive system assures registration accuracy within 0.005 inches. Bidirectional drive also allows plotting and printing on the same line. Precision dot placement anywhere on the form provides contiguous plots at all times.

COLORPLOT 100 plots and prints at 150 or 250 lines per minute; the standard ASCII 96 character set is available for printing applications. Double high characters, 6 or 8 lines per inch and lower case characters with descenders are interface selectable.

Centronics and Data Products plug compatible interface is standard. Compatibility with electrostatic plotters manufactured by Versatec is available optionally.

TM

## Specifications

### Printer Mechanism

Rate	150 lines per minute, 7x9 dot matrix; or 250 lines per minute, 7x7 dot matrix
Matrix	7 horizontal x 9 vertical for medium speed — 150 lpm 7 horizontal x 7 vertical for high speed — 250 lpm
Horizontal Format	132 characters per line 6 or 8 lines per form; operator or interface selectable
Character Set	96 ASCII character set; double high characters and lower case characters with descenders
Plot Mode	
Dot Diameter	0.020 inch
Resolution	100 dots per inch/horizontal and vertical
Plot Speed	15 inches per minute/0.25 inch per second; single color copy — 45 seconds for 11-inch forms multicolor copy — 3 minutes for 11-inch forms (average)
Plot Resolution	1320 points
Form Size	0.005 inch vertical and horizontal

per Type

Edge punched, fanfold forms, 1 to 6 parts; 4 to 16 inches wide

Adjustable tractors both above and below print station for bidirectional paper drive

Speed 46 ms 1/6 inch step

Paper Slew Rate 6 inches per second

Forms Length Switch 8 switch positions for forms 3 to 14 inches long

Paper Controls &amp; Switches Paper Motion Detector and Paper Out Switch

### Ribbons

Standard Black	1 inch wide x 60 yards long; nylon
Tricolor	1 inch wide x 60 yards long, 20 yards per color

### Operator Controls & Indicators

External Controls	Power Switch (lower left side) Top of Form On-Line/Off-Line 6/8 LPI Paper Advance Check Reset
Internal Controls	Form Thickness Adjust Horizontal Vernier Vertical Positioning Self-Test Switch Forms Length Switch Multicolor/Single Color Select
Indicators	Power On Check 8 LPI On-Line

### Interface

Data Input	ASCII Parallel TTL Logic Levels Full Line Buffer
Compatibility	Centronics and Data Products
Options	Versatec plug compatibility RS 232 C Standard Interface

### Power Requirements

Voltages	100, 110, 120, 200, 220, 240
Voltage Limits	+10%; -15%
Frequency	50/60 Hz ( $\pm 2$ Hz)
Power	200 watts standby
Consumption	450 watts nominal 800 watts maximum

### Environmental

Temperature	Operating: 10°C to 38°C Storage: -40°C to 65°C
Humidity	Operating: 10% to 90% Storage: 5% to 95%
Operating Altitude	to 7500 ft.
Static Discharge	to 15,000 volts
Operating Attitude	no restrictions

### Dimensions

Height	41.0 inches with pedestal
Width	30.0 inches
Depth	24.3 inches
Weight	210 lbs.

# TRILOG T-1100A Printer/Plotter

## The Plain Paper Plotter®

- ☐ Versatec\* software and plug compatible
- ☐ 100 dots per inch vertical and horizontal
- ☐ Plain paper, up to 6 copies
- ☐ Highest quality plotter output
- ☐ 4" to 16" form width
- ☐ You *never* have "toner bars", the T-100 requires no chemicals
- ☐ 96 character set

The TRILOG T-1100A impact printer/plotter provides the only alternative to electrostatic printer/plotters. The T-1100A utilizes raster matrix technology and plots at 15 inches per minute with dot density of 100 dots per inch on plain paper, and is Versatec software and plug compatible.

TRILOG's T-1100A reduces operating costs by 75% by using standard fanfold paper. Paper for the

TRILOG T-1100A is 0.5¢ per sheet, compared to 2.0¢ or more per sheet for special sensitized paper needed for electrostatic printer/plotters. Forms from 4 to 16 inches wide and up to six parts can be accommodated in the TRILOG printer/plotter.

No chemicals are required, eliminating unwanted "toner bars." Continuous paper motion is not required to minimize toner bars, allowing the T-1100A to be completely stopped for extended periods of time.

The T-1100A prints at 150 lines per minute with a standard 96 character set. Additional features include underlining, double high characters, 6 and 8 lines per inch and lower case characters with descenders.

The T-1100A is recognized by Underwriters Laboratory under EDP 478.

\*Versatec, a Xerox company

# Specifications

## Printer Mechanism

## THE TRILOG 2 SPEED T-100 PRINTER/PLOTTER

The TRILOG "PLAIN PAPER PLOTTER" can now be configured to print at 150 LPM or 250 LPM. The 150 uses a full 7 X 12 matrix to produce a character that looks fully formed. The 250 LPM mode prints a 7 X 6 matrix that has the appearance of a dot matrix formation. When a T-100 or T-1100A is ordered the customer must specify which print speed is desired.

A new two speed option is also offered for those customers that want both text quality output and high speed printing. Changing from 150 to 250 LPM is done with a software command (a\*SO code or CNTL-N) or an operator accesible switch. Plot speed and other TRILOG features are not affected by this option.

\*\*\*\*\* 250 lines Per Minute \*\*\*\*\*

This portion is printed at 250 LPM under program control. A CNTL-N shifts from the 150 LPM character set to a less dense 250 LPM character set without operator intervention. Standard features of the TRILOG T-100 and T-1100A are:

- 96 UPPER AND LOWER CASE CHARACTER SETS
- 100 X 100 DOTS PER INCH PLOT DENSITY
- 6 INCHES PER SECOND PAPER SLEW
- U.L. APPROVAL
- 4 TO 16 INCH WIDE FORMS
- 1 TO 6 PART FORMS
- DOUBLE HIGH CHARACTERS
- UNDERLINING
- DATAPRODUCTS OR CENTRONICS INTERFACE (T-100)
- VERSATEC INTERFACE (T-1100A)
